VIKING AND SEA-FIRE SHARE COMMITMENT TO EXCELLENCE

Renowned for its luxury performance sportfishing and cruising vessels, Viking Yacht Company incorporates the very best in design and performance. This includes fire suppression systems from Sea-Fire Marine, a world leader in onboard fire safety. Expanding on their long relationship, Sea-Fire products are now standard on all Viking yachts, including the new 92c.

"Viking and Sea-Fire have a long history together," said Eric Metz, Viking mechanical engineer. "Sea-Fire's products are well designed, engineered, and manufactured. Fire suppression is one of the systems on the boat you hope you never need, but if you do need it, you need to be able to trust that it will work as expected. Reliability is huge, and we feel that Sea-Fire has the most reliable system on the market. They also have a global service network, which is key for a boatbuilder who delivers boats all around the world."

Because Viking prides itself on designing and manufacturing almost every component in house, its use of Sea-Fire products is high praise indeed. "Over the years, Viking has tried other fire suppression system manufacturers for certain applications," said Metz. "But we're now back to installing Sea-Fire on every one of the boats we build today. The engineering, sales and customer service support we get from Sea-Fire has

-more-

been fantastic. We feel their product line is the best out there for the pleasure marine market."

Pre-Engineered FD Model Series fire suppression systems from Sea-Fire are included as standard equipment on all Viking boats between 13 m' and 19 m. The FD Model Series employs lightweight, corrosion-resistant, USCG-approved canisters. Viking also uses Sea-Fire Engineered H-Series Fire Suppression systems on all its models from 20 m to 28 m. Fully customizable with a variety of options, the H-Series is tested and approved in accordance with IMO/SOLAS requirements. Additionally, Viking protects small, hard-to-reach areas, such as the space over fuel tanks, with Sea-Fire Stinger Fire Extinguishers.

Dedicated to caring for people and their investments, Sea-Fire provides boaters with security and peace of mind with a wide range of fire suppression products. Delivering the ultimate in 24/7 fire protection, Sea-Fire equipment is manufactured in the US and sold throughout the world.
